# INSTALLATION GUIDE

Payson Checkout for PrestaShop 1.7

Payson Checkout is designed for maximum conversion. In our new and fast payment solution, we have lost all unnecessary steps at the checkout to increase your sales. The payment window is integrated into your e-shop where customers can easily complete the purchase in just a few clicks! The solution also supports sales between companies, "B2B".

The customer can choose to get home the item and subsequently pay for invoice or partial payment, or to pay the order directly with card or internet bank.

Payson Checkout has our lowest transaction cost and you do not get any fixed fees. Get started quickly, within 24 hours when you create an account with BankID!

Conditions

The module is developed for PrestaShop 1. 7 .x and we recommend using the latest stable version for maximum performance.

Payson Checkout supports currencies SEK and EUR and languages Swedish, English, Norwegian, Danish, Finnish, German and Spanish.

Download

Download the module *https://github.com/PaysonAB/PaysonCheckout2-Prestashop-1-7/raw/master/paysoncheckout2.zip* and save it to your computer.

Installation

1.   Log in to the store as an administrator.
2.   Click "Modules->Module Manager" in the menu.
3.   Click "Upload a module" in the top right corner.
4.   Click "Select a file" in the box that appears and select the downloaded file
       paysoncheckout2.zip.

Settings

Agent

- **Test mode**
  To use a TestAgent leave "Test Mode" set to "Yes" and enter the Agent ID and API Key.

  With a TestAgent Agent ID and API Key, transactions and logs are created at *https://test-www.payson.com* so that the installation can be tested. Create a TestAgent here: *https://test-www.payson.se/TestAccount/Create*

  Once the installation is tested, it's time to enter the store's Agent ID and API Key. Open a PaysonAccount, *https://account.payson.se/account/create/?type=b* to create the Store's Agent ID and API Key.

  To use a real PaysonAccount set "Test Mode" to "No" and enter the Agent ID and API Key.

- **Agent ID**
  An Agent ID is retrieved by opening a PaysonAccount or TestAccount.

- **API-key**
  An API key is retrieved by opening a PaysonAccount or TestAccount.

Configuration PrestaShop

The setting "Disable all bypasses " should be set to "No". The setting can be found under "Advanced Settings-> Performance".

The setting "Terms of service" should be set to "Yes" and a page should be selected for "Page for the Terms and conditions". The setting can be found under "Shop Parameters-> Order Settings".

Order Processing

The module has the option of automatically updating a payment at Payson when an order is updated in the store.

You can activate, cancel or refund a payment at Payson. Currently it is not possible to partially refund a payment.

Select at which order status an update will be sent to Payson.

Select "Deactivated" to disable the feature.

- **Mark payment as shipped**
  Select the order to be marked as shipped from the order list in PrestaShop.

  Change order status to the one selected in the module settings, such as "Sent". Click "Update Status".

  Payment at Payson now receives status "Shipped" and the customer is notified.

- **Cancel a payment**
  Select the order to be canceled from the order list in PrestaShop.

  Change order status to the one selected in the module settings, such as "Cancelled". Click "Update Status".

  Payment at Payson now receives status "Cancelled".

- **Refund a payment**
  Select the order to be refunded from the order list in PrestaShop.

  Change order status to the one selected in the module settings, such as "Refund". Click "Update Status".

Payment at Payson now receives status "Credited".
